

Incompatible code snippet

```
1  async.doWhilst(  
2    loopCallback => { ...; loopCallback(null, result); },  
3    () => q.nextToken, // Changed to async style in v3.x  
4    (err, res) => callback(err, err ? null : res));
```

No external knowledge

LLM Response -> Invalid Behaviors

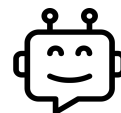

Incorrect root cause: *async.doWhilst no longer supports the "callback as first argument" style. (Hallucination)*

Inapplicable fix:

```
- ( ) => q.nextToken,  
+ function() { return !!q.nextToken;},
```

Coarse-grained change records

- during and doDuring have been removed, and instead whilst , doWhilst , until and doUntil now have asynchronous test functions. (#850, #1557)

Lack of diverse records

LLM Response -> Runtime Error

Correct root cause: *doWhilst must now accept a callback to signal completion.*

Inapplicable fix:

```
- ( ) => q.nextToken  
+ ( cb ) => cb(null, q.nextToken)
```

Fine-grained change records

Change Record Sources

breaking: remove during, make test functions in until/whilst async #1557

[Merged](#) aearly merged 3 commits into [master](#) from [until-as-async](#) on Jul 11, 2018

Changelogs

Structural Records

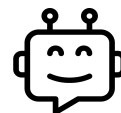

Description: doWhilst: the test must now be asynchronous.

Change Type: Behavior Change

Changed Object:

- type: call
- classpath: async
- method: doWhilst
- property: None

Adaptation Method: /*Code Snippets*/

Fined-grained records support

LLM Response -> Successful update

Correct root cause: *doWhilst must now accept a callback to signal completion.*

Applicable adaptation:

```
- ( ) => q.nextToken  
+ ( value, cb ) => cb(null, q.nextToken)
```
